- ▶ 1.8 Class DOJO Resets

Science

This 2018 school year, science will be filled with experiments and trials. Students will have lab partners and a science notebook to help them behave and look at life as a scientist does. Science is a subject that will soon be tested in a standardized format. We are aiming to prepare all students at Chase School to do well in this area of learning. One way we are being intentional about this is to focus on science inquiry lessons every week. Our current unit is Earth's Structures and Plate Tectonics.

General Information

Hello Parents,

We are having a fast start to 2018 so far! We feel that every student should do their best this year to be Superheroes!. We are going to begin resetting goals to really learn what behaving and learning like a Superhero means for every student. We desire all students to reach their goals this year! Students reach their goals when parents and teachers work as partners. Here are two tips to help us this year:

- Check homework and ask questions about all homework.
- Know that there is reading homework everyday! Students must read for 30 minutes and do their reading boxes.

We will do our best to stay connected with you if there are any issues.

Thank you,
Ms. Martinez, Mr. Borges

Math

In math class we are beginning our Algebra unit!. Our Algebra course will follow this schedule daily:

- Math Talks – Mental Math discussions (5-10 minutes)
- Review Homework (5-10 min.)
- Lesson (20-25 minutes)
- Practice w/ teacher (5-10 min.)
- Start Homework (5-10 min.)

We always start our homework in class so that students can finish it at home without needing help from anyone. Expect more homework than usual.
